Data Sheet

60W 976nm Uncooled Multimode Wavelength Stabilized Laser Diode Module

TY-976+/-01NM-60.0W-25C-105-0.22NA-V

SkyEra delivers TY-976+/-01NM-60.0W-25C-105-0.22NA-V diode lasers employing professional coupling technology, that enjoy multiple advantages, e.g., compact design, stable output power, high power, high efficiency and convenient packaging. These laser diode modules can provide solutions for fiber laser applications and direct suppliers.

The performance and aging tests have been performed upon the production line to guarantee reliable, stable and long lifetime of products. To provide customers with high-quality, high-cost performance products is the company's goal.

Key Parameters:

- Based on single fire spot laser module
- High output power 60W
- High stability
- 0.22NA 105µm core multimode fiber
- Parallel weld 2-Pin sealed package
- Standard central wavelength 976nm
- Narrow linewidth
- RoHS compliance

Application:

- Medical
- Lighting
- Pump source
- Material processing

Unit: mm ; undeclared tolerance: ±0.5mm.

- 3. Instructions
- Avoid eyes or skin exposure to direct or scattered radiation;
- ESD protection is required for transportation, storage and operation; short-circuit protection between pins is required for transportation and storage.
- Please connect pins by solder when operating current is over 6A; solder point should be close to the root of pins with a max soldering temperature at 260°C and a duration less than 10 seconds;
- Drive constant current power supply by laser and avoid surge while working;
- Operate under rated current and rated power;
- Good heat dissipation is required;
- Operating temperature is $20^{\circ}C \sim 30^{\circ}C$;
- Storage temperature is $-30^{\circ}\text{C} + 70^{\circ}\text{C}$.
